Falsi verbi deboli

I verbi **deboli** finiscono con *j* o *w* ma in geroglifico non e **MAI scritta** (è derivata da una ricostruzione teorica e si scrive solo in translitterazione).

Se compare la *j* in scrittura il verbo è *forte* e deriva da una mutazione di un'antica *r* finale evolutasi poi in *j*. Esempi:

 mnj (3-Lit)	Ormeggiarsi
 smj (caus 3-Lit)	Riferire, fare rapporto

Solo due verbi presentano la *j* in scrittura ma sono **veramente deboli** ovvero *rwj* (partire fuggire) ed il suo causativo *srwj*. La *j* solitamente cade nelle forme verbali diverse dall'infinito (*rwj.t*; *srwj.t*)

**Non essere vanitoso a causa di ciò che sai,

**Una parola saggia è più nascosta di una pietra preziosa
ma la si può trovare presso le serve che sono alla macina.”**
